Preface

This book is aimed to provide English majored students at intermediate level with solid foundation in reading skills including specific reading skills, grammar points as well as related vocabulary. It is hoped that students, who are studying English as a Foreign Language at the intermediate level, are able to identify and master the reading skills, recognize and use grammar points along with vocabulary.

This in-house material is compiled from the textbook named “Q: Skills for Success 2 - Reading and Writing” written by [Sarah Lynn](#). The current material consists of eight-unit lessons taken from the original textbook and some other sources, with extra-tasks created by the compilers to give students a chance to further practice and review what they have learned from each unit.

We would like to thank our staff members who contributed for these documents and papers. We would also receive any comments from specialists, colleagues and students to improve this document of work.

Compilers

Table of Contents
